

METALSKIN

CUT PROTECTION GLOVE LEVEL F

EN ISO 21420 4X43F X1XXXX

EU regulation 2016/425 attest n°0075/057/162/02/21/0262 EXT 03/07/25 delivered by CTC, notified body n°0075

Composition

METALSKIN is designed to offer high-performance protection, while guaranteeing comfort and precision in demanding working environments.

100% black high density polyethylene filament and metallic filament:

Combines abrasion and cut resistance with optimum flexibility, even for the most delicate tasks.

100% textured polyamide yarn in black:

Provides extra strength and protection against engineering industry risks, while remaining lightweight and mobile.

Black CleanPu® coating:

The coating on the palm and fingertips provides excellent grip and increased resistance to wear, improving durability and safety when handling slippery or abrasive objects.

Insertion of 100% carbon thread:

Located at the tip of the thumb and forefinger, this thread ensures compatibility with touch screens, making the glove ideal for tasks requiring the use of electronic devices while maintaining maximum protection.

Coated reinforcement between thumb and forefinger :

To improve resistance and durability, an additional reinforcement has been placed between these two fingers, areas that are often used during manual work.

Elasticated wrist :

Ensures a perfect adjustment and secure holding, keeping the glove in place throughout the working day, while preventing the ingress of dust or debris.

METALSKIN is specially designed for environments requiring both a high level of protection against engineering industry risks and the ability to work with tools or touch screens.

Sizes

6 - 7 - 8 - 9 - 10 - 11 - 12

Packaging

Pack of 10 - Box of 200

Full compatibility
with touch screens

Optimum grip for
excellent handling
of components

Reinforced thumb
crease for a secure
grip and greater
resistance in the area

Greater comfort for
extended wear
without discomfort.

Product benefits

Enhanced durability

Thanks to a **strategic patch** between the thumb and index finger, these gloves offer **extra protection** against premature wear, extending their life, even under **intensive use**.

The black **Clean PU®** coating makes it exceptionally **hard-wearing** in the face of repeated rubbing, guaranteeing **sustainable performance** in **demanding environments**.

Abrasion resistance

Versatility of use

Designed for **a range of industries**, these protection gloves combine **resistance and comfort**.

They meet the needs of professionals who require **durable protection** without compromising **freedom of movement**.

The **flexibility of the Clean PU®** coating means that your fingers remain **perfectly mobile**, giving you a **good tactile feel** and making it **easy to handle** even the thinnest objects.

Dexterity and precision

Optimum comfort

Designed to **fit the hand perfectly**. These protection gloves offer an **ergonomic adjustment**, reducing fatigue and allowing **prolonged wear without discomfort**.
